

THE PREFERRED CHOICE  
of leading gym equipment manufacturers.

SAFE.

STRONG.

# AUT-O-LOC™

Gymnasium Safety Strap  
with Secure-Loc

**AUT-O-LOC** Gymnasium Safety Strap by LynRus defines a new standard in suspended gymnasium equipment safety. The all new Patented design is backed by years of experience and testing. Faster and stronger than other designs, significantly lowering the total force your building structure will experience if a fall should happen.

## Secure Locking

The all new patented Aut-O-Loc with Secure-Loc captures a falling load and prevents the re-use of an actuated unit.

## Fail Safe Construction

Should the movement of a load ever exceed the normal operating parameters, the Aut-O-Loc prevents a free fall by sensing not only speed but acceleration, engaging only when it's truly needed without the danger of false locks that can damage your equipment.

## Quiet Operation

Allows the locking mechanism to operate quietly while in use so you can hear your moving equipment unlike toggle and ratchet type designs.

## Maximum Travel and Fall Indicators

Let you know when you have caught an equipment fall or reached the maximum belt payout limit.

## Roller Guide System

Designed to reduce friction wear and extend strap life while allowing the belt to capture heavier loads.

## Integrated Pivot Mount

Aligns in the direction of the force during a fall reducing the total amount of stress on the belt and your building structure.

## Attachment System

Mounts parallel or 90 degrees on 3 inch pipe or 4 inch tube using supplied clamps; optional mounting clamps available.

## Powerful Recoil

Generates 50% more belt tension than the original design.

## Fully Supported Drum

Captures the most demanding loads while maintaining strap alignment.

PROTECT YOUR GYM.

# Time for a new AUT-O-LOC.™

The Preferred Choice of  
leading gym equipment  
manufacturers

## 1<sup>st</sup> Generation - 1988

Patented in 1988,  
the first generation  
automatic locking  
backstop safety device

- Single point drum support
- Pawls lock and release after a load is caught allowing multiple loads to be caught without notification
- The average Aut-O-Loc1 Unit is 23 years old

LynRus recommends  
replacing your Aut-O-Loc™  
after 15 years of use.

## 3<sup>rd</sup> Generation - 2017

Patented in 2017,  
Introducing The New  
Aut-O-Loc 3™  
by LynRus

- New 3rd generation patented design in 2017
- Multi point drum support increases strength and sets the standard for backstop fall safety
- Patented Secure-Loc™ locks three multidirectional pawls permanently when equipment falls are caught.
- Integrated fall indicator lets you know the unit has caught a load
- Integrated pivot mount significantly reduces point load forces on structure during a fall
- Belt guide system reduces belt wear and increases capacity
